

Cancer Resource Services

A Department of Health Program

Transportation Assistance Policy

Wyoming Cancer Resource Services (WCRS) is part of the State of Wyoming Cancer Program. Our purpose is to reduce the burden of cancer within the state of Wyoming. We help Wyoming residents receive their cancer screenings, educate people about cancer prevention strategies, and provide patient navigation services to cancer patients. We help connect people with local, regional, and national programs and organizations.

WCRS Region IV helps clients with travel expenses for cancer-related medical reasons, including screenings, Doctor's office visits, consultations with specialists, surgery, cancer treatments, and any other cancer-related need, which requires transportation. Funds are limited, so the following guidelines will be used to maximize the number of Wyomingites who can utilize this program. WCRS Region IV Program Manager will determine the amount of assistance provided based on the distance to be traveled, frequency, and length of the treatment plan. Applicants should consider the following:

- Transportation assistance applications must be on file to receive assistance.
- A signed receipt acknowledging the funds received must be returned to the WCRS.
- Documentation of treatment plans and or appointments may be required.
- The maximum amount an applicant can receive is \$500; exceptions, determined on a case by case basis, may be made.
- The availability of funds fluctuates, do not plan on receiving a specific amount.
- Applicants may only receive funds from one WCRS region.
- WCRS discretion will be also be used to determine eligibility, and each application will be evaluated on a case by case basis.

Wyoming Cancer Resource Services is here to help you. If you have questions or other needs, please reach out to me.

Sincerely,

Cindy Glaser, BSN, RN
